VITALIZE & ENERGIZE:

Stylish and full of energy for the day ahead.

Pressure distribution that has been incorporated in accordance with the latest findings improves the blood circulation and oxygen supply and actively stimulates the legs. The form-stabilizing effect also gives your legs that perfect shape, leaving them feeling nice and slender, and comfortably light even under extreme conditions.

The two product variants Leg Vitalizer and Leg Energizer have varying functions and each meet high requirements when it comes to offering stylish and dynamic mobility.

FEEL THE ENERGIZING EFFECT

Leg Vitalizer Medium

Ideal for remaining fresh and in shape despite the limited mobility that makes our everyday life a challenge. The anatomically adapted pressure distribution stimulates the arteries and veins in the upper layers of the skin. The strain is even reduced on your legs while standing and they will stay feeling light and actively energized for many hours.

Leg Energizer Strong

Ideal for overcoming extreme stress in style. The vitalising effect of the anatomically adapted pressure distribution with its enhanced range of functions also ensures deeper arteries and veins. This gives your legs more energy and leaves them feeling light and buoyant. It can also prevent your legs from rapidly losing their shape from the inside out and leaves them looking beautiful for longer.
